CAREER PROFILE

I am a seasoned Ruby developer with over 14 years of hands-on experience, driven by a passion for challenges and continuous learning. Having forged my path as a self-made developer, I thrive in dynamic environments where problem-solving and innovation are paramount.

TECHNICAL SKILLS

EXPERIENCE

Developer Lead - Consultant 2021 - Present
Endava - Payments Company.

As a Senior Developer working on a payment orchestrator platform, I have spent the last three years analyzing, designing, and implementing gateway integrations that align with our core architecture and business logic.

As a Lead, my role requires a strong mix of hard and soft skills to coordinate my team and fulfill these responsibilities:

- Evaluate and architect large-scale projects.
- Implement various flows for payment gateway integrations.
- Mentor teammates and ensure the team's conceptual clarity on payments-related work.
- Assist in coordinating implementation with external clients.
- Support Endava's development discipline in creating and coordinating the Ruby community.

Endava Senior Transversal Team Support:

- Support Endava in the selection process with technical interviews.
- Support the Ruby community by creating the Ruby skill matrix, learning path, and pass-it-ons.
- Support development discipline as a Copilot Champion in Copilot-related training.

Senior Software Engineer 2020 - 2021
Endava - HR Company

As a senior developer, I worked with an Endava client on a human resource-oriented application. My role as a sole contributor was to develop full-stack features for the platform while simultaneously finding ways to enhance its efficiency. In the course of this work, my responsibilities included:

- Assisting in all aspects of the agile cycle coordination.
- Developing features using RoR and React.
- Identifying and implementing performance enhancements.
- Assisting teammates with complex database-related tasks.

Software Engineer 2016 - 2020
Endava - Marketing Aggregating Company.

As a Ruby developer, I worked on the ETL side of a marketing company, primarily creating and adding changes to API adapters that aggregate data from various marketing services.

In this role, my responsibilities included:

- Adding new adapters to the ETL library.
- Using and enhancing the ETL DSL library.
- Debugging marketing metrics on different marketing platforms.

PROJECTS AND OSS CONTRIBUTIONS.

These are some of my personal projects.

Cirrus.js - An HTTP 1.0 compliant web server for the Velneo V7 Platform

Velneo Plugins - A set of plugins, mostly cloud integrations (AWS S3, Dropbox, OneDrive, SendGrid, etc.) for the Velneo V7 Platform

RiakG - A Go CLI to interact with the Riak Database
